MATERIALS NEEDED:

Watercolor paint
Watercolor paper
Water cup
Brushes
Washi tape

STEP 1 - PREP

Take a sheet of the watercolor paper and tape down all the edges to the table. This allows for the paper to stay flat when water is applied.

STEP 2 - CREATING LINES

Use the Washi tape to create lines in any geometric shape you desire. Make sure the Washi tape is completely secured onto the paper so there won't be any leaks underneath the tape.

STEP 3 - APPLY CLEAN WATER

Take a wet brush (preferably a medium to large size brush) and apply a thin layer of water to a section.

STEP 4 - APPLY WATERCOLOR PAINT

With a brush loaded with watercolor, apply right on top of the wet section. This technique is called “wet on wet”, which allows the watercolor to be evenly dispersed creating that water-like texture.

Repeat steps 3 and 4 to all sections until complete.

STEP 5 - WAIT

Let your paper dry completely before moving on to the next step. This must be done to ensure the layer of paint will not smear or rub off. If paper feels moist, it means that it is still wet.

STEP 6 - DETAILS

Now this technique is called “wet on dry” meaning you will be using wet watercolor paint on top of dry paper. Make sure the paint brush does not have too much water, the less water on the brush, the darker the details will be.

STEP 7 - PEEL!

Once everything is dried, slowly and carefully remove all the Washi tape from your paper. And you're done!

Be creative and have fun! Choose your favorite colors and favorite patterns!
